✓ SAME DAY PAVING & REPAIRS

During the late 1970's and into the early 1980's, Felix A. Marino Company pioneered today's standard practice of permanently repairing the pavement of utility cuts the same day as the excavation. The evolution of this process replaced the old practice of installing a temporary repair that inevitably failed multiple times before a permanent repair was performed long after the excavation. The Company's process patented method of utilizing base and top pavement gradations when repairing pavement cuts the "same day" has become the industry standard.

The Felix A. Marino Company offers 24 hour, 7 day, year-round pavement repairs utilizing heated storage boxes to maintain proper pavement material temperatures to ensure proper

workability and compaction at time of placement. Felix A. Marino Company maintains a fleet of fully equipped patching vehicles to meet the demands of even the largest of projects.

The Felix A. Marino Company also offers the complete process of conventional patching services, including; full depth removal and replacement of all failed pavement materials and surface milling, removal and replacement.
